

M-Systems
Flash Disk Pioneers

Product Update

Product:	ATA and CompactFlash	Product update #:	PU0800
Subject:	Improved CIS for the ATA and CompactFlash	Date:	March 30, 2000

Overview

Starting April 1st, 2000, M-Systems ATA PC Card and CompactFlash will contain an improved CIS. The improved CIS will support more platforms (in addition to all previously supported platforms).

Reason of change:

The new CIS improves the compatibility of the product with the platforms in the market.

Availability

This will be effective April 1st, 2000.

Marking:

The P/N with the new CIS is changed to:

<u>OLD Cat. No.</u>	<u>Improved CIS cat. No.</u>
