

## ***New Software Version 1.08 and 1.09***

### ***FFD 2.5" Ultra ATA***

Product Update, May 2004

#### **Description**

A temporary software version 1.08 and a new software version 1.09 have been released for the FFD 2.5" Ultra ATA. These versions replace the current software version 1.07. The main changes are as follows:

1.08 vs. 1.07:

- Improved compatibility with non-standard FireWire-ATA adapters (1394 to IDE)
- Improved booting with low-quality or slower power supplies

1.09 vs. 1.08:

- Improved compatibility with various Master-Slave settings
- Improved manufacturability

#### **Ordering Information**

The new software versions are applicable for the following product:

<b>Product</b>	<b>Capacity (MB)</b>	<b>Updated Ordering Information</b>
FFD 2.5" Ultra ATA	All capacities	<b>FFD-25-UATA-CCCCC-T-H</b> CCCCC - Indicates disk capacity T - Indicates operating temperature range H - Indicates the case height

#### **Reason for Change**

The new software versions provide enhanced product performance.

#### **Availability**

FFD 2.5" Ultra ATA will be shipped with software version 1.09 from June 1, 2004. Customers that prefer to keep the previous software version 1.07 for new ordered units must notify M-Systems. Special ordering information will be provided to indicate that the FFD 2.5" Ultra ATA has been shipped with the requested older software version.

#### **How to Contact Us**

Please contact your M-Systems representative or visit the DiskOnChip web page on the M-Systems website ([www.m-systems.com](http://www.m-systems.com)) for any further information or assistance.
