

New Software Version 1.38

for FFD 2.5" Ultra-Narrow SCSI

Product Update, October 2004

Description

A new software version 1.38 has been released for the FFD 2.5" Ultra-Narrow SCSI. This version replaces the current software version 1.35. The main change is improved flash management.

Ordering Information

The new software version is applicable for the following products:

Product	Capacity (MB)	Ordering Information
FFD 2.5" Ultra-Narrow SCSI	512, 1024, 2048, 2560, 3072, 4096, 5120, 6144, 7168, 8192, 9216, 10240, 12288, 14336, 15360	FFD25US-CCCC-T-P50-H CCCC - Indicates disk capacity (MB) T – Indicates operating temperature range H – Indicates case height (mm)

Reason for Change

The new software version provides improved flash management, which results in improved product reliability.

Availability

The FFD 2.5" Ultra-Narrow SCSI is being shipped with software version 1.38 as of October 1, 2004. Customers that prefer to keep the previous software version 1.35 for newly ordered units must notify M-Systems. Special ordering information will be provided to indicate that the FFD 2.5" Ultra Narrow SCSI has been shipped with the requested older software version.

How to Contact Us

Please contact your M-Systems representative or visit the FFD web page on the M-Systems website (www.m-systems.com) for any further information or assistance.
